

What Is Claimed Is:

1. A device for projecting an object (2) in a space of a vehicle (1).
2. The device as recited in Claim 1, wherein the device is assigned a voice input and output (302, 303).
3. The device as recited in Claim 1 or 2, wherein the device is configured for holographic projection of the figure (2).
4. The device as recited in one of the preceding claims, wherein the device is configured in such a way that the device allows a driver (3) to select the figure (2) to be projected.
5. The device as recited in one of Claims 2 through 4, wherein the device is connectable to a sensor system (305, 306) for monitoring the driver (3) and/or the vehicle (1), the device being configured in such a way that the device influences the projection of the figure (2) and the voice output as a function of a first signal of the sensor system (305, 306).
6. The device as recited in one of the preceding claims, wherein the device projects the figure (2) as a function of a second signal from a seat occupancy recognition system (208).
7. The device as recited in one of the preceding claims, wherein the device is connected to a communication means (207, 307, 308) in such a way that the device influences the projection of the figure (2) as a function of a third signal from the communication means (207, 307, 308).
